

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page1 of 16
Print date: 4-3-2025

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identification:

Product name: Patina 77/2 for bronze, copper and brass
UFI code: G942-VODK-MOON-GOCE
Product form: Mixture
Product type: Paint
Product group: Commercial product

1.2 Relevant identified uses of the substance or mixture and uses advised against:

Main use category: Industrial use, Professional use
Specific industrial/professional use: Paint
Use of the substance or mixture: Industrial
Uses advised against: Not to be used for private purposes (household). Food, drinks and animal feed

1.3 Details of the supplier of the safety data sheet:

Manufacturer : ASSYST bvba / A.S.O.W. bvba
Hellegatstraat 13a
2590 Berlaar
Belgium
Tel: +32 495 50 61 14 / +32 496 83 70 27
Website: www.assyst.org / www.artsuppliesonweb.com
Email: ao@assyst.org / vera.opsommer@assyst.org

1.4 Emergency phone number:

For Belgium: Call the **Poison Control Centre (070 245 245 - free)**, if not available: **02 264 96 30** (normal rate) or your doctor. In life-threatening situations, always call the European emergency number **112**.
NHS 24 Direct For help from a GP, visit your GP surgery's website, use an online service to contact your GP, or call the surgery. **For urgent medical help**, use the NHS 111 online service, or **call 111** if you are unable to get help online. **For life-threatening emergencies, call 999** for an ambulance. There is more information about getting medical help on the NHS website.

SECTION 2: Hazard identification

2.1 Classification of the substance or mixture:

Classification according to directive (EC) No 1272/2008 and its amendments.

The product is classified according to current legislation.

Classification in accordance with Regulation (EC) No 1272/2008 as amended.

Health hazards

Skin corrosion/irritation 2 Skin Irrit. 2 H315
Serious eye damage/eye irritation 2 Eye Irrit. 2 H319
Acute hazard to the aquatic environment 1 Aquatic Acute 1 H400
Chronic danger to the aquatic environment 1 Aquatic Chronic 1 H410
See SECTION 16 for full text

Adverse physicochemical, health and environmental effects

Causes severe burns and eye damage.
Toxic to aquatic organisms, with long-term effects.
Leaks and firewater can lead to contamination of waterways.

2.2 Labelling elements:

Labelling according to regulation (EC) No 1272/2008 [CLP/GHS]:

SAFETY DATA SHEET

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page 2 of 16
Print date: 4-3-2025

Hazard pictograms:

Signal word

Danger.

Hazardous ingredients to be declared on the label:

- copper (ii) nitrate 2,5-hydrate pure
- ammonium chloride

Hazard statements:

H272 May promote fire; oxidising.
H302 Harmful if swallowed.
H315 Causes skin irritation.
H319 Causes severe eye irritation.
H410 Very toxic to aquatic organisms with long-lasting effects.

Precautions

Prevention:

P264 After handling this product, wash skin thoroughly.
P273 - Avoid discharge into the environment.
P280 - Wear protective clothing, eye protection, face protection, protective gloves.

Action:

P303+P361+P353+P310 - IF ON SKIN (or hair): remove contaminated clothing immediately. Rinse/shower skin with water. Consult a doctor immediately.
P305+P351+P338+P310 - IF ON CONTACT WITH EYES: Rinse cautiously with water for several minutes; remove contact lenses, if possible; continue rinsing. Consult doctor immediately.
P337 + P313 In case of persistent eye irritation: consult a doctor.
P391 - Clean up any leaks/spills.

2.3 Other hazards:

If spilled, the floor may be slippery.

This substance/mixture does not contain any components that can be considered persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

Ecological information

The substance/mixture does not contain any components believed to have endocrine-disrupting properties according to REACH article 57(f) or Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at level 0.1% or higher.

Toxicological information:

The substance/mixture does not contain any components believed to have endocrine-disrupting properties according to REACH article 57(f) or Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at level 0.1% or higher.

SECTION 3: Composition and information on ingredients

3.2 Mixtures:

Chemical Name	CAS No. EC-No. Index no. Registration number	Classification (Regulation (EC) No 1272/008)	Concentration (%)
Copper (II) nitrate trihydrate $\text{Cu}(\text{NO}_3)_2 \cdot 3 \text{H}_2\text{O}$	CAS No.: 10031-43-3 EC No: 600-060-3 - REACH reg. no.: 01-2119969290-34	Ox. Sol. 2, H272 Acute Tox. 4 H302 Skin Irrit. 2 H315 Eye Irrit. 2 H319 Aquatic Acute 1, H400 Aquatic Chronic 1, H410 M-factor Aquatic Acute: 1 Aquatic Chronic: 1	< 5

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025

For explanation of abbreviations, see section 16.

SECTION 4: First aid measures

4.1 Description of first-aid measures:

General advice:

Emergency workers: take care of your own protection too!
Remove contaminated clothing immediately.
At risk of unconsciousness, place and transport in stable lateral position.

By inhalation:

If you feel unwell, consult a doctor.
Move to fresh air in case of incidental inhalation of vapours or decomposition products.
It can be dangerous for those giving mouth-to-mouth resuscitation.

On contact with skin:

Rinse immediately with plenty of water.
Consult a doctor.
Remove and wash contaminated clothing before reuse.

In case of contact with eyes:

IF CONTACT WITH EYES: rinse gently with water for several minutes; remove contact lenses, if possible; continue rinsing.
Protect undamaged eye.
Consult an ophthalmologist immediately.

If swallowed:

Rinse mouth with water.
Consult doctor/medical service.
DO NOT induce vomiting.
Let the victim rest.
Never administer anything by mouth to an unconscious person.

4.2 Main acute and delayed symptoms and effects:

The main known symptoms and effects are described on the label (see section 2.2) and/or section 1.1.

4.3 Indication of immediate medical attention and special treatment required:

Treatment of symptoms (removal of contaminant, monitoring of vital signs), no specific antidote known.
Ensure adequate ventilation, especially in enclosed areas.

SECTION 5: Fire-fighting measures

5.1 Extinguishing media:

Suitable extinguishing agents:

Dry powder. Carbon dioxide. Foam. Alcohol-resistant foam.

Unsuitable extinguishing media:

Do not use a strong water jet.

5.2 Special hazards arising from the substance or mixture:

Fire hazard:

Possible formation of hazardous fumes.

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page 4 of 16
Print date: 4-3-2025

Explosion hazard:

Heat can cause pressure and the bursting of closed vessels, spreading the fire and increasing the risk of burns and injuries.

Reactivity in case of fire:

Smoking/fogging.

Possible formation of toxic gases.

Hazardous decomposition products in case of fire:

When heated: formation of harmful gases/vapours.

Nitrous gases, nitrogen oxides.

5.3 Advice for firefighters:

Fire precautions:

Approaching with the wind.

Wear self-contained breathing apparatus.

Evacuate.

Extinguishing instructions:

Cool exposed vessels with a water spray or mist.

If possible, cool the containers/tanks/reservoirs by spraying water.

Consideration of environmentally contaminated firewater.

Protection during firefighting:

Approaching against the wind.

Autonomous breathing apparatus.

Full respirator.

Fully protective clothing.

Do not enter fire zone without suitable safety equipment, including respiratory protection.

Other information:

Do not inhale the vapours.

Avoid the product contaminating groundwater.

Do not pollute ground and surface water.

SECTION 6: Measures in case of accidental release of the substance or mixture

6.1 Personal precautions, protective equipment and emergency procedures:

General measures:

Evacuate personnel to a safe place.

Avoid contact with eyes and skin and do not inhale vapour or mist.

Ensure adequate ventilation.

Wear personal protective equipment.

Keeping upwind.

Use only after you have read and understood all safety instructions.

Plug the leak if it can be done safely.

See chapter 8.

Contaminated work clothes must not leave the work area.

6.2 Environmental precautions:

Do not discharge into groundwater, surface water or the sewerage system.

For further information, see paragraph 13.

6.3 Methods and materials for containment and cleaning:

For containment:

Collect and dispose of all waste in suitable and labelled containers in accordance with locally applicable regulations.

Absorb in an absorbent product (e.g. sand, sawdust, universal binder, silica gel).

Cleaning methods:

Vacuum up large spills with a pump or Hoover.

Absorb spill liquid in absorbent including: sand, earth, vermiculite or lime.

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page 5 of 16
Print date: 4-3-2025

Clean contaminated surfaces with plenty of water.

Other information:

The spilled product may be dangerously slippery.

Do not inhale the vapours.

6.4 Reference to other sections:

Information on exposure control, personal protection and handling conditions can be found in sections 8 and 13.

SECTION 7: Handling and storage:

7.1 Precautions for safe handling of the substance or mixture:

Additional hazards in processing:

Electrostatic charges can build up during handling.

Precautions for safe handling of the substance or mixture:

Avoid contact with eyes and skin and do not inhale vapour or mist.

Use only in well-ventilated areas.

Before using, consult the special instructions.

Use only after you have read and understood all safety instructions.

Avoid vapour formation.

Handle and open the container/packaging carefully.

Emergency eye showers and safety showers should be installed in close proximity to any place of potential exposure.

Provide a local exhaust or general ventilation of the room.

Wear personal protective equipment.

Wear respiratory protection in case of inadequate ventilation.

Hygiene measures:

Wash hands and other exposed parts with mild soap and water before eating, drinking, smoking or leaving work.

Do not eat, drink or smoke while using this product.

Remove and wash contaminated clothing immediately before reuse.

Contaminated work clothes must not leave the work area.

Handle in accordance with good industrial hygiene and safety practices.

7.2 Conditions for safe storage, including incompatibilities:

Technical measures:

Provide a local exhaust or general ventilation of the room.

Ensure suitable ventilation, especially in enclosed areas.

Emergency eye showers and safety showers should be installed close to any place of potential exposure.

Storage conditions:

Keep behind lock.

Store in a dry place.

Keep container tightly closed to avoid contamination and moisture absorption.

Keep away from heat, hot surfaces, sparks, open flames and other sources of ignition.

No smoking.

All packaging should have a label warning against exposure.

Store in a safe manner in accordance with local/national regulations.

Non-combinable fabrics:

Keep away from: strong acids, strong bases and oxidising agents, reducing agents.

Incompatible materials:

Keep away from strong acids and strong oxidising agents.

Heat and ignition sources:

Protect from heat and direct sunlight.

No flames, no sparks.

Remove all ignition sources.

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page 6 of 16
Print date: 4-3-2025

Information on mixed storage:

Separation of food and combustible materials.

Storage:

Protect from direct sun rays.
Store in a well-ventilated place.

Special packaging requirements:

Keep only in the original packaging.
Correctly labelled.

7.3 Specific end use:

For the relevant identified use(s) in section 1, the advice in section 7 should be taken into account.

SECTION 8: Exposure controls/personal protection measures**8.1 Control parameters:****Components with workplace limits:****Occupational exposure limits (occupational exposure limits)****Calcium chloride CAS 10043-52-4**

Country	Substance name	CAS No.	Identification	TGG 8h [mg/m ³]	TGG 15 min [mg/m ³]	CW [mg/m ³]	Notation	Source
BE	particles not elsewhere classified		VLEP/GWBB	10			i	Belgian Official Journal
EU	particles not elsewhere classified		VLEP/GWBB	3			r	Belgian Official Journal

Notation

CW: Ceiling value is a limit value that must not be exceeded (ceiling value)
i Inhalable fraction
r: Respirable fraction
TGG 15 min: Short-time value (short-term exposure limit): limit that may not be exceeded and which applies, for a period of 15 minutes (unless otherwise stated)
TGG 8 hours: Time-weighted average (long-term exposure limit): measured or calculated from an eight-hour reference period (unless otherwise stated)

Derived no-effect doses (DNEL) according to Regulation (EC) Number 1907/2006:**Calcium chloride CAS 10043-52-4**

Relevant DNEL and other thresholds				
End point	Threshold	Protection objective, route of exposure	Used in	Exposure time
DNEL	5 mg/m ³	human, via inhalation	(industrial) employees	chronic - local effects
DNEL	10 mg/m ³	human, via inhalation	(industrial) employees	acute - local effects

Copper nitrate CAS 10031-43-3

End point	Threshold	Protection objective, route of exposure	Used in	Exposure time
DNEL	1 mg/m ³	human, via inhalation	(industrial) employees	chronic - systemic effects
DNEL	1 mg/m ³	human, via inhalation	(industrial) employees	chronic - local effects
DNEL	137 mg/kg bw/day	human, through the skin	(industrial) employees	chronic - systemic effects

Predicted no-effect concentration (PNEC) according to Regulation (EC) Number 1907/2006:**Copper nitrate CAS 10031-43-3**

End point	Threshold	Organism	Environmental compartments	Exposure time
PNEC	7.8 µg/l	Aquatic organisms	Freshwater	short-term (one-off)
PNEC	5.2 µg/l	aquatic organisms	Seawater	short-term (one-off)
PNEC	230 µg/l	aquatic organisms	sewage treatment plants (STP)	short-term (one-off)
PNEC	87 mg/kg	aquatic organisms	Freshwater sediment	short-term (one-off)
PNEC	676 mg/kg	aquatic organisms	Sea water sediment	short-term (one-off)
PNEC	65 mg/kg	terrestrial organisms	Bottom	short-term (one-off)

8.2 Exposure control measures:**Individual protection measures (personal protective equipment)****Eye/face protection**

Wear safety goggles with side protection.

Skin protection**Hand protection**

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page 7 of 16
Print date: 4-3-2025

Wear suitable gloves.

Suitable are EN 374-tested gloves against chemicals.

It is recommended that, in case of special applications, the chemical resistance of the safety gloves mentioned above be checked together with the supplier of the gloves.

Times are estimated values from measurements at 22°C and permanent contact.

Increased temperatures due to heated fabrics, body heat, etc.

And a reduction in effective layer thickness due to stretching can lead to a significant reduction in breakthrough time.

If in doubt, contact the manufacturer.

For a layer thickness approximately 1.5 times larger / smaller, the respective breakthrough time is doubled / halved.

The data applies only to the pure substance.

When transferred to mixtures of substances, they should only be considered as guidelines.

Type of material

NBR (nitrile rubber)

Material thickness

>0.11 mm

Breakthrough time of glove material

>480 minutes (permeation level: 6)

Other protective equipment

Insert rest periods for skin regeneration.

Preventive skin protection (skin-protective creams) is recommended.

Protection of respiratory organs

Respiratory protection is necessary in case of: Dust generation.

Particle filter (EN 143). P2 (filters at least 94% of air particles, colour code: white).

Managing environmental exposure

Avoid getting the product into drains, surface water or groundwater.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties:

Physical state:	Liquid
Occurrence:	Liquid.
Colour:	light blue.
Odour:	Characteristic scent.
Odour threshold value:	Not determined due to respiratory sensitising properties
Melting point:	Not applicable
Freezing point:	not determined
Boiling point:	not determined
Flammability (solid, gas):	not determined Non-flammable.
Explosion limits:	not established
Flash point:	Not applicable
Self-ignition temperature:	Not applicable
Decomposition temperature:	not determined
pH:	not determined
pH solution:	not determined
Viscosity, kinematic:	No data available
Viscosity, dynamic:	not determined
Solubility:	Water: not determined
Partition coefficient n-octanol/water (Log Pow):	not determined
Vapour pressure:	not determined

SAFETY DATA SHEET

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page 8 of 16
Print date: 4-3-2025

Density: not determined
Relative vapour density at 20°C: not determined
Vapour pressure at 50°C: not determined
Relative density: not determined
Explosive properties: Based on its structure, this product is classified as non-explosive.
Oxidising properties: Due to its structure, the product is classified as non-oxidising.

9.2 Other information

SADT: not established
VOC content: not determined
Other properties: Where necessary, information on other physical and chemical parameters is given in this section.
Additional information: No further information available.

SECTION 10: Stability and reactivity

10.1 Reactivity:

Stable under normal conditions.

10.2 Chemical Stability:

Stable under normal conditions.

10.3 Potential Hazardous Reactions:

May decompose on exposure to high temperature, releasing toxic fumes.

Reacts with: Strong acid.

Reacts violently with bases.

10.4 Conditions to avoid:

Keep away from heat sources and direct sunlight.

No flames, no sparks.

Remove all ignition sources.

10.5 Chemically interacting Materials:

Acids and bases.

Strong oxidising agents.

10.6 Hazardous Decomposition Products:

No hazardous decomposition products, if storage and handling instructions/indication are observed: zinc oxide.

SECTION 11: Toxicological information

11.1 Information on toxicological effects:

Acute toxicity:

Constituents:

Calcium chloride CAS 10043-52-4

Is not classifiable as acutely toxic.

Route of exposure	End point	Value	Species	Method	Source
Oral	LD50	2,120 mg/kg	Rat		ECHA
Dermal	LD50	>5,000 mg/kg	Rabbit		ECHA

Copper nitrate CAS 10031-43-3

Harmful if swallowed.

Route of exposure	End point	Value	Species	Method	Source
Oral	LD50	940 mg/kg	Rat		TOXNET

Ammonium chloride CAS 12125-02-9

Harmful if swallowed.

Route of exposure	End point	Value	Species	Method	Source
Oral	LD50	1,410 mg/kg	Rat		ECHA
Dermal	LD50	>2,000 mg/kg	Rat		ECHA

Skin corrosion/irritation:

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page 9 of 16
Print date: 4-3-2025

Causes severe burns.

pH: not determined

Constituents:

Copper nitrate CAS 10031-43-3

Causes skin irritation.

Serious eye damage/eye irritation:

Causes serious eye damage.

pH: not determined

Respiratory/skin sensitisation:

Is not classifiable as inhalant or skin allergenic.

Mutagenicity in gametes:

Is not classifiable as mutagenic in germ cells (mutagenic).

Carcinogenicity:

Is not classifiable as carcinogenic.

Reproductive toxicity:

Is not classifiable as a reproductive toxicant.

STOT on single exposure:

Cannot be classified as toxic to specific target organs (single exposure).

STOT on repeated exposure:

Cannot be classified as toxic to specific target organs (repeated exposure).

Aspiration hazard:

Is not classifiable as dangerous in aspiration.

Symptoms related to physical, chemical and toxicological properties

- After swallowing

vomiting, nausea

- In case of contact with eyes

Causes severe eye irritation

- After inhalation

Inhaling dust can lead to respiratory irritation, cough, breathlessness

- On contact with skin

Frequent and prolonged skin contact can lead to skin irritation

- Other information

no

11.2 Additional information

Contains no endocrine disruptor (ED) at a concentration of $\geq 0.1\%$.

11.3 Information on other hazards

There is no further information.

SECTION 12: Ecological information

12.1 Toxicity:

Toxic to aquatic organisms, with long-term effects.

Aquatic toxicity (acute) - Calcium chloride CAS 10043-52-4

End point	Value	Species	Source	Exposure time
LC50	4,630 mg/l	Fish	ECHA	96 h
ErC50	>4,000 mg/l	Alg	ECHA	72 h

Aquatic toxicity (acute) - Copper nitrate CAS 10031-43-3

End point	Value	Species	Source	Exposure time
LC50	193 µg/l	Fish	ECHA	96 h

Aquatic toxicity (acute) - Ammonium chloride CAS 12125-02-9

End point	Value	Species	Source	Exposure time
LC50	42.91 mg/l	Fish	ECHA	96 h
EC50	101 mg/l	aquatic invertebrates	ECHA	48 h

Aquatic toxicity (chronic) - Calcium chloride CAS 10043-52-4

SAFETY DATA SHEET

Print date: 4-3-2025

End point	Value	Species	Source	Exposure time
EC50	610 mg/l	aquatic invertebrates	ECHA	21 d

Aquatic toxicity (chronic) - Ammonium chloride CAS 12125-02-9

End point	Value	Species	Source	Exposure time
ErC50	1,300 mg/l	Alg	ECHA	5 d
EC50	2,700 mg/l	Alg	ECHA	18 d

12.2 Persistence and Degradability:

Metal patina 77/2

Persistence and degradability:

Not established.

12.3 Bioaccumulation:

Metal patina 77/2

Partition coefficient n-octanol/water (Log Pow):

not established

Bioaccumulation:

This product has not been tested for environmental impact.

Component

Ammonium chloride CAS 12125-02-9

Does not concentrate significantly in organisms.

n-octanol/water (log KOW)	-4.37 (Lit.)
---------------------------	--------------

12.4 Mobility in soil:

Metal patina 77/2

Ecology - soil:

No specific data.

12.5 Results of PBT and vPvB assessment:

Metal patina 77/2

This substance/mixture does not meet the PBT criteria of the REACH regulation, annex XIII

This substance/mixture does not meet the vPvB criteria of the REACH regulation, annex XIII

12.6 Endocrine disrupting properties

Product:

The substance/mixture does not contain any components believed to have endocrine-disrupting properties according to REACH article 57(f) or Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at level 0.1% or higher.

12.7 Other Harmful Effects:

Other adverse effects:

No further information available.

Additional information:

Avoid discharge into the environment.

No experimental research on the product is available.

The information provided is based on our knowledge of the ingredients and the classification of the product is determined by calculations.

SECTION 13: Disposal instructions

13.1 Waste treatment methods:

Dispose of this substance and its packaging as hazardous waste.

Dispose of contents/packaging in accordance with local/regional/national/international regulations.

Information regarding wastewater discharge

Do not throw waste into the sink.

Waste treatment of containers/packaging

Contaminated packaging can be treated like the substance itself.

Fully emptied containers can be recycled.

Relevant provisions on waste prevention

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025
Trade name: Patina 77/2 for bronze, copper and brass

Page 11 of 16
Print date: 4-3-2025

The allocation of waste key numbers/waste markings should be industry- and process-specific in accordance with AVV.

Hazardous properties of waste

HP 4 irritant - skin irritation and eye damage

Comments

Waste is separated into the categories that can be treated separately by local or national waste management services.

Please note the relevant national or regional provisions.

Uncontaminated and completely empty containers can be used again.

SECTION 14: Information relating to transport

14.1 UN number

Not applicable

14.2 Proper cargo name according to UN model regulations

Not applicable

14.3 Transport hazard class(es)

Not applicable

14.4 Packing group

Not applicable

14.5 Environmental hazards

Not applicable

14.6 Special precautions for the user

Not applicable

14.7 Transport in bulk in accordance with Annex II to MARPOL 73/78 and the IBC Code

Not applicable for product, as delivered.

SECTION 15: Statutory information

15.1 Safety, health and environmental regulations and legislation specific to the substance or mixture:

Relevant European Union (EU) provisions

Restrictions in accordance with REACH, Annex XVII

Restricted hazardous substances (REACH, Annex XVII)

Name of substance	Name according to inventory	CAS No.	Restriction	No.
Calcium chloride	substances in ink for tattoo or permanent make-up		R75	75
Copper (II) nitrate trihydrate	substances in ink for tattoo or permanent make-up		R75	75
Ammonium chloride	inorganic ammonium salts		R65	65
Ammonium chloride	substances in ink for tattoo or permanent make-up		R75	75

Legend

R65

1. Shall not be placed on the market or used in insulating blends of cellulose or insulating articles of cellulose after 14 July 2018, unless the ammonia emission from these blends or articles results in a concentration of less than 3 ppm, expressed on a basis (2.12 mg/m³), under the test conditions specified in point 4. A supplier of an inorganic ammonium salt-containing cellulose insulating mixture shall inform the recipient or consumer of the maximum allowable load of the cellulose insulating mixture, in thickness and density. A downstream user of an inorganic ammonium salt-containing cellulose insulating blend must ensure that the maximum allowable load notified by the supplier is not exceeded.

2. By way of derogation, point 1 shall not apply to the placing on the market of insulating blends of cellulose intended solely for the manufacture of insulating articles of cellulose, or to the use of such blends in the manufacture of insulating articles of cellulose.

3. In the case of a Member State which has, on 14 July 2016, provisional national measures approved by the Commission under Article 129(2)(a), the provisions of paragraphs 1 and 2 shall apply from that date.

4. Compliance with the emission limit value specified in the first subparagraph of point 1 shall be demonstrated in accordance technical specification CEN/TS 16516 with the following adaptations:

- the duration of the test is at least 14 days, instead of 28 days;
- during the test, ammonia gas emissions must be measured at least once a day;
- the emission limit value shall not be reached or exceeded for each measurement made during the test;
- the relative humidity is 90%, instead of 50%;
- a suitable method for measuring ammonia gas emissions must be used;
- the load, expressed in thickness and density, is recorded during the sampling of the cellulose insulating mixtures or articles to be tested.

According to directive 1907/2006/EC,
Version 4.0 Review date: 20-01-2025

R75

1. Shall not be placed on the market in mixtures for tattooing purposes, and mixtures containing such substances shall not be used for tattooing purposes after 4 January 2022 if the substance(s) in question is/are present or if the following circumstances occur:

- a) in the case of a substance classified in Part 3 of Annex VI to Regulation (EC) No 1272/2008 as carcinogenic category 1A, 1B or 2, or as germ cell mutagenic category 1A, 1B or 2, the concentration of that substance in the mixture is equal to or greater than 0.00005 % by weight;
- b) in the case of a substance classified as toxic to reproduction category 1A, 1B or 2 in Part 3 of Annex VI to Regulation (EC) No 1272/2008, the concentration of that substance in the mixture is equal to or greater than 0.001 % by weight;
- c) in the case of a substance classified as a category 1, 1A or 1B skin allergen in Part 3 of Annex VI to Regulation (EC) No 1272/2008, the concentration of that substance in the mixture is equal to or greater than 0.001 % by weight;
- d) in the case of a substance classified in Part 3 of Annex VI to Regulation (EC) No 1272/2008 as corrosive to the skin, category 1, 1A, 1B or 1C, or irritant to the skin, category 2, or for serious eye damage, category 1 or irritant to the eyes, category 2, the concentration of that substance in the mixture is equal to or greater than:
 - i. 0.1 % by weight, if the substance is used solely as a pH regulator;
 - ii. 0.01% by weight, in all other cases;
- e) in the case of a substance listed in Annex II to Regulation (EC) No 1223/2009 (*1), a concentration in the mixture equal to or greater than 0,00005 % by weight; in the case of a substance for which column g (Product type, body parts) of the table in Annex IV to Regulation (EC) No 1223/2009 indicates one or more of the following types of conditions, the concentration of the substance in the mixture equal to or greater than 0,00005 % by weight:
 - i. "Products washed off, out or away";
 - ii. "Do not use in products applied to mucous membranes";
 - iii. "Do not use in eye products";
- f) in the case of a substance for which a condition is specified in column h (Maximum concentration in the product ready for use) or column i (Other) of the table in Annex IV to Regulation (EC) No 1223/2009, the concentration of the substance in the mixture does not meet the condition specified in that column, or the substance otherwise fails to meet it;
- g) in the case of a substance listed in Appendix 13 to this Annex, the concentration of the substance in the mixture is equal to or greater than the concentration limit specified for that substance in that Appendix.

2. For the purposes of this entry, the use of a mixture "for tattooing purposes" means the injection or insertion of the mixture into the skin, mucous membranes or eyeball of a person by means of a process or procedure (including procedures commonly referred to as "permanent make-up", cosmetic tattooing, "microblading" and "micropigmentation"), for the purpose of leaving a permanent mark(s) or drawing on that person's body.

3. Where a substance not listed in Appendix 13 falls under more than one of items (a) to (g) of paragraph 1, the most stringent of the concentration limits set out in those items shall apply to that substance. Where a substance listed in Appendix 13 also falls under one or more of items (a) to (g) of paragraph 1, the concentration limit set out in paragraph 1(h) shall apply to that substance.

4. By way of derogation, paragraph 1 shall not apply to the following substances until 4 January 2023:

- a. Pigment Blue 15:3 (CI 74160, EC No 205-685-1, CAS No 147-14-8);
- b. Pigment Green 7 (CI 74260, EC No 215-524-7, CAS No 1328-53-6).

5. If Part 3 of Annex VI to Regulation (EC) No 1272/2008 is amended after 4 January 2021 and thereby classifies or reclassifies a substance in such a way that it falls under (a), (b), (c) or (d) of paragraph 1 of this entry, or falls under a different entry than before, and if the date of application of that new or revised classification is after the date referred to in paragraph 1 or, as the case may be, paragraph 4 of this entry, that amendment shall be treated, for the purposes of applying this entry to that substance, as applying on the date of application of that new or revised classification.

6. Where the entry of a substance in Annex II or Annex IV to Regulation (EC) No 1223/2009 is amended after 4 January 2021 such that the substance falls under (e), (f) or (g) of point 1 of this entry, or under a different point than before, and if the amendment takes effect after the date referred to in point 1 or, as the case may be, point 4 of this entry, that amendment shall be treated, for the purposes of applying this entry to that substance, as taking effect from the date falling 18 months after the entry into force of the act which adopted that amendment.

7. Suppliers placing a mixture on the market for tattooing purposes after 4 January 2022 shall ensure that the following information is indicated on the mixture:

- a) the text "Mixture for use in tattoos or permanent make-up";
- b) a unique batch identification reference number;
- c) the list of ingredients according to the nomenclature defined in the glossary of common ingredient names in accordance with Article 33 of Regulation (EC) No 1223/2009, or, in the absence of a common ingredient name, the IUPAC name. In the absence of a common ingredient name or IUPAC designation, the CAS and EC number. Ingredients shall be listed in descending order of weight or volume of ingredients at the time of formulation. Ingredient means any substance added during the formulation of the mixture for tattooing purposes and present therein. Impurities are not considered ingredients. Where the name of a substance used as an ingredient within the meaning of this entry must already be indicated on the label in accordance with Regulation (EC) No 1272/2008, that ingredient need not be indicated in accordance with this Regulation;
- d) the additional entry "pH regulator" for substances covered by paragraph 1(d)(ii);
- e) the statement "Contains nickel. May cause allergic reactions." if the mixture contains nickel below the concentration limit specified in Appendix 13;
- f) the statement "Contains hexavalent chromium (VI). May cause allergic reactions." if the mixture contains chromium (VI) below the concentration limit specified in Appendix 13;
- g) safety precautions for use, if not already required to be indicated on the label in accordance with Regulation (EC) No 1272/2008. The information shall be clearly visible, easily legible and indelible. The information shall appear in the official language(s) of the

Member State(s) where the mixture is marketed, unless otherwise specified by the Member State(s) concerned. If there is not enough space on the packaging for the information referred to in the first subparagraph, that information shall, except as regards point (a), be included in the instructions for use. The person administering the mixture shall provide the information specified on the packaging or in the instructions for use in accordance with this point to the person undergoing the procedure before the mixture is used for tattooing purposes.

8. Mixtures without the text "Mixture for use in tattoos or permanent make-up" shall not be used for tattooing purposes.
9. This entry does not apply to substances which are gases at a temperature of 20 °C and pressure of 101.3 kPa, or which generate a vapour pressure greater than 300 kPa at a temperature of 50 °C, with the exception of formaldehyde (CAS No 50-00-0, EC No 200-001-8).
10. This entry does not apply to the placing on the market or use of mixtures for tattooing purposes that are placed on the market or used exclusively as medical devices or accessories to a medical device within the meaning of Regulation (EU) 2017/745. Where a mixture has not been placed on the market or cannot be used exclusively as a medical device or an accessory to a medical device, the requirements of Regulation (EU) 2017/745 and the requirements of this Regulation apply cumulatively.
