## FIXIT SCULPT

### **DESCRIPTION:**

Fixit Sculpt is a very versatile product that combines the functions and advantages of hot modeling clay with the industrial strength and adhesive power of epoxy! The clay-like substance resists sagging and holds small details and impressions very well. Its firm, fine grain structure, supported by fiber technology, is well suited to many applications ranging from detailed and intricate sculptures to a multitude of repairs. A generous 4 hours of working time to achieve the finest details.

### **PROPERTIES:**

- ✓ Fixit is self-curing
- ✓ Mixes easily with water
- ✓ Clay-like consistency
- ✓ Ideal for modeling, sculpting
- ✓ Resistant to subsidence
- ✓ Keeps details and impressions
- ✓ Matte finish
- ✓ Extreme adhesion, durable and strong: resistant to UV rays, fuels, fuel vapors, acids, outdoors, ...
- ✓ Adheres to almost any clean surface including ceramic, porcelain, fiberglass, foam, textiles, glass, metal, stone, wood, cement and more!
- ✓ Water resistant
- ✓ 0% shrinkage
- ✓ Working time 4 hours. Curing time 24 hours.
- ✓ Can be sanded, drilled, tapped, painted, ...
- ✓ Non-hazardous: without solvents or vapours

### **INSTRUCTIONS FOR USE:**

- ✓ Wear suitable gloves
- ✓ Take equal parts of A and B. Both have a clay-like consistency.
- ✓ Mix for 2 minutes until you obtain a homogeneous color.
- ✓ Fixit Sculpt is now ready to use and has a working time of 4 hours. Fixit can be smoothed with the finger and a little water or Aves Safety Solvent.
- ✓ Can be painted both wet and dry.
- ✓ Clean with water or Aves Safety Solvent.

### **VARIOUS APPLICATIONS:**

- ✓ Great for those who need extra work time for intricate sculptures.
- ✓ Excellent for antler and bone art.
- ✓ Ceramic repairs, ...

### **TIPS:**

- ✓ 24 hours curing time is needed to get the product waterproof and for the hard finishing purposes like sanding, grinding, drilling, ...
- ✓ Shelf life can be extended by freezing and thawing the product.
