FIL CRISTAL UV

DESCRIPTION:

Monocomponent transparent resin (cures in 2 minutes with UV rays).
PRODUCT FOR PROFESSIONAL USE.

PRODUCT FEATURES:

ULTRA TRANSPARENT: the resin is in liquid form; Cures rapidly in 1-6 minutes when exposed to light from a UV source while maintaining its crystalline effect.

EASY TO USE:

Fill the mould and expose everything to UV rays from the sun or a UV lamp. That's all there is to it!

EASY TO COLOUR:

Colour the resin as desired through a wide selection of specific resin dyes such as our opaque pigments for synthetic resins or transparent pigments for synthetic resins.

IDEAL FOR DIY:

Create jewellery, trinkets, pendants, earrings, artistic decorations and much more, the limit is only your imagination!
